**Introduction**
We require that you submit a plan of correction for each deficiency listed on the inspection report form. Your plan of correction must be submitted to the DOH within ten business days of receipt of the list of deficiencies.

**Descriptive Content**
Your plan of correction must provide a step-by-step description of the methods to correct each deficient practice to prevent recurrence and provide information that ensures the intent of the regulation is met.

An acceptable plan of correction must contain the following elements:

- The plan of correcting the specific deficiency;
- The procedure for implementing the acceptable plan of correction for the specific deficiency cited;
- The monitoring procedure to ensure that the plan of correction is effective and that specific deficiency cited remains corrected and/or in compliance with the regulatory requirements;
- The title of the person responsible for implementing the acceptable plan of correction.

Simply stating that a deficiency has been "corrected" is not acceptable. If a deficiency has already been corrected, the plan of correction must include the following:

- How the deficiency was corrected,
- The completion date (date the correction was accomplished),
- How the plan of correction will prevent possible recurrence of the deficiency.

**Completion Dates**

**Plan of Correction BHA.FS.60873304**
