Licensed Child Caring Agency Site Visit Report
Residential Care

Licensee: ADAPT – Deer Creek
Executive Director: Greg Brigham, PhD
Program Director: Ron Farley
Board Chairperson: Kelsey Wood
Date of site visit: 9/24/24
Licensing Coordinator: Mary Torres

Other Regulatory or Accrediting Agencies: Oregon Health Authority (OHA). A joint review with OHA was conducted on the same day at the request of the program.

Program Compliance: The program was found to be compliant or will be compliant with OAR 419-400-0005 to 419-400-0310, Licensing Umbrella Rules, and OAR 419-470-0010 to 419-470-0180, Licensing Residential Care Agencies Rules. Personnel records were reviewed and compliance with required background checks was documented for employees in all programs.

Program Description as summarized by the program: Deer Creek is an adolescent treatment center for chemically dependent and co-occurring adolescents from the ages of 13 to 17. We are licensed for 15 beds and contracted to serve primarily OHP clients through our local CCO. We serve the entire state of Oregon and each county's respective CCO, receiving referrals from agencies who have assessed teens meeting the ASAM requirements. Our primary catchment area is Douglas, Coos, and Curry Counties. Our average length of stay is 4.5 months. Deer Creek uses the Adolescent Community Reinforcement Approach (ACRA) as our primary treatment approach. We provide gender-specific groups and provide a seeking safety curriculum. We prioritize pregnant teens and injection drug users.

Program type and services as reported by the program: Adapt offers medical services for all clients, and we refer to local providers as needed for other services. Our clients attend Twelve-Step meetings in the community and have access to church services. We have a family program each Sunday and recreation each Saturday. We provide classes and life skills, alcohol, and other drug education, as well as school provided by an accredited education provider. Clients can work towards either a GED or high school diploma depending on what meets their needs.
We have a full-time director of Adolescent Services that overseas both outpatient as well as residential services. We have two full-time counselors, one of which is the lead counselor and overseas daily activities. The lead counselor is also an LCSW who provides mental health assessments and treatment. We have an intake coordinator, classroom aide, lead counselor assistant and residential assistants who cover all shifts.

Capacity and Age Range: 15 residents, ages 13 -17 years

Funding sources: Oregon Health Authority (OHA) contracts, program revenue, local Coordinated Care Organizations (CCO) – Umpqua Health Alliance (UHA), Advanced Health and other third-party payors

Contracts and sources for referrals: Department of Human Services (statewide), communities throughout the state, schools within Douglas County, family referrals

Average length of stay: 4.5 months

Average daily population served: 6 to 10 residents

Number of children served annually: 55 residents

Use of seclusion or restraint: Deer Creek does not use either seclusion or restraint.

Interviews, Observations: Youth and staff were interviewed at the time of this review, and a tour of the facility was completed. Youth report feeling safe with in the program and report positive experiences during their stay. The number and variety of outings that youth are able to attend was identified as a strength of the program. One minor change requested was more instruction time with the school's art teacher. Youth enjoy the food at the program and appreciate the counselor's support and involvement in meeting goals. Youth also benefit from daily family contact.

Staff interviews highlighted census; 4 youth currently on site at the time of the review with an increase in numbers over the next few days, staffing updates, and changes in the program's educational curriculum as well as changes with a former medical provider. New staff member reports experiencing good support during transition and how the youth-focused training has prepared them for their role on campus.

A tour of the building resulted in no concerns for the program's physical plant.

Program Strengths as identified by the program: We have an experienced program director and staff that have been with us for many years. We have access to mental health and primary care providers through Adapt. We use the YMCA as part of our exercise program four times per week. We provide opportunities for community support groups. We have a dining area for both upstairs and downstairs to have snacks and other food readily available. We have lots of open area for clients to have space and recreation—sand volleyball court, fields, and a garden area. Because we are a smaller program we can do some extra individualized treatment, for example a client attending UCC or visiting Job Corps.

Program Challenges as reported by the program: A significant challenge is the acuity of the mental health needs of clients being referred. An ongoing challenge is recruiting and maintaining staff. Another challenge, which is very recent, is when CCOs deny requests to complete treatment. When private insurance does this we bill the parents, but when a CCO denies completion care the families have already met a poverty level that billing would make an unnecessary hardship.

Changes that have occurred in the last 2 years as reported by the program: The biggest change came last year when we moved to online schooling from a more traditional classroom setting. The transient nature of our residential assistants. We hired a new counselor, Willie Haaby. We have added a daily program of counselor led meditation. We have returned to a similar programing we had prior to COVID, including family

program, passes and more community involvement. We now have in-house Basic Life Support (BLS) classes through Adapt Integrated Health Care staff.

Lawsuits: None, according to the program.

Grievances and complaints filed in the last two years: The program received and addressed 10 formal grievances over this last licensing period. Nine of the grievances were initiated by a resident while one grievance was filed by a parent. All grievances were addressed in a short amount of time and handled at the lowest level of review and intervention needed.

Corrective Actions and Timeframes: Please submit the following to verify compliance.

Within 45 days of receipt of this report (insert name of agency) must submit a letter of verification indicating the agency is in compliance with the specific rules cited above and describing how compliance will be maintained going forward. Along with the letter of verification, the agency must submit any and all specific documentation requested in the body of this report. The letter of verification and any additional requested documents can be emailed directly to (Licensing Coordinator and email address).

Exceptions: The program had no exceptions over this last licensing period.
