Notice of Serious Incident

Case Number: 025926

Date of Incident: 12/5/2024

Date Received: 12/6/2024

Facility Name: Piney Ridge Treatment Center

Facility Number: 203

Incident Type: Licensing

Report Description: On 12/5/24 around 1230 the resident [REDACTED] was face down on the ground with hands shaking. Resident did not respond to nurse requests to turn over for further evaluation. Psychiatrist and DON evaluated resident with nursing. After 2-3 minutes, resident turned over and stated that he felt dizzy. Resident sat in the educational hallway with nurses for 5 minutes until resident felt ready to return to the unit. Psychiatrist and medical APRN ordered resident to be evaluated at Children's Hospital NWA for seizure-like activity. While walking back to the unit to await transport, the resident began complaining of chest pain and began to sink to the ground. Resident safely lowered to the ground with assistance from nursing and staff. Vital signs assessed and WNL. Resident continued clutching at his chest and complaining of pain and trouble breathing. O2 saturation 98%. The facility notified his worker whom informed us that the resident has a history of faking seizure like activity. While this was again suspected but because the resident is new to the facility and we do not have medical documentation to back this up - he was sent on transport at 1245. Resident returned from Children's Hospital NWA at 1530. CXR 2 view completed, EKG completed, urinalysis, CBC w/ diff, CMP completed. No abnormal findings noted. Resident discharged to PRTC with instructions to continue all medications as prescribed. This will be processed clinically.

Interim Action Narrative:

Maltreatment Narrative:

Licensing Narrative: Licensing reviewed the report. Licensing specialist will follow up with the facility for nursing notes, discharge summary and safety precautions. 12/9/2024 - Nursing notes and medical information received, reviewed and uploaded to ELS.
