Interview summary
2 clients and 2 staff were interviewed as a part of the site visit. One client reported having been at the program for almost 2 months, and the other was close to three months at the program and nearing discharge. Both clients reported liking being at Embark, feeling safe at the program and liking staff. Both clients reported favorite staff being Violet and Anna, and one client also noted Lexi as a favorite as well. Both clients reported liking the food, and both spoke highly of dessert nights on Tuesday's and Thursday's. Neither client reported feeling unsafe and both talked about being able to call home when they wanted and that the calls were private without staff listening in. One client wished that the program had therapy dogs and that dessert night was every night. The other client wished for more safe space when having groups with other clients, as sometimes other clients are not respectful of sharing. Both staff interviewed reporting liking working at Embark Bend. One staff reported being with the program since December, and the other since December 2023. Both staff reported their favorite part of the job was working with the kids, and one staff specifically noted how much they liked being able to help clients through hard and sad times. When asked about the most challenging part of the job one noted that there are a lot of "hoops" to jump through to get new things approved (which they described as multiple levels of approvals) and the other noted keeping staff focused on their own work and not what other teams were doing as being difficult. Both staff spoke highly of management, noting specifically that things have improved in the last few months with the new and recently promoted leadership team. When asked about training, both reported that it was good and noted that onboard training has improved recently with shift supervisors taking on more responsibility. One staff wished the program had a bigger budget for outings, as clients really look forward to the weekends and getting to go do things. The other staff wished the program would replace the bunnies with different therapy animals.

Observations
The program was well maintained, clean and in good shape. The site tour included all areas that clients have access to and rooms were consistently clean, organized, and in good condition. Furnishings throughout appeared to be well cared for.

Corrective actions and timeframes:

Please submit the following to verify compliance.

Oregon Department of Human Services

Within 45 days of receipt of this report **Embark Behavioral Health – Calo Programs Missouri, Inc.** must submit a letter of verification indicating the agency is in compliance with the specific rules cited above and describing how compliance will be maintained going forward. Along with the letter of verification, the agency must submit any and all specific documentation requested in the body of this report. The letter of verification and any additional requested documents can be emailed directly to **Jeff Minden at Jeffrey.E.Minden@odhsoha.oregon.gov.**
