December 5, 2024

Woodridge of The Ozarks
2466 S 48th St, Ste B
Springdale, AR 72762-6683

The Division of Provider Services and Quality Assurance (DPSQA) of the Arkansas Department of Human Services has contracted with Arkansas Foundation for Medical Care (AFMC) to perform Inspections of Care (IOC) for Inpatient Psychiatric Services for Under 21. The Medicaid Manual for Inpatient Psychiatric Services for Under Age 21 was used in the completion of this report.

Observations and any deficiencies noted are listed below for the inspection conducted at the following service site on the following date:

Woodridge of The Ozarks
Provider Medicaid ID: [REDACTED]
Onsite Inspection Date: December 02, 2024
Onsite Inspection Time: 10:35 AM

A summary of the inspection and any deficiencies noted are outlined below.

The provider must submit a Corrective Action Plan (CAP) designed to correct any deficiency noted in the written report of the IOC. Accordingly, you must complete and submit to AFMC a Corrective Action Plan for each deficiency noted. The Corrective Action Plan must state with specificity the:

- (a) Corrective action to be taken.
- (b) Person(s) responsible for implementing and maintaining the corrective action; and
- (c) Completion date or anticipated completion date for each corrective action.

The CAP must be completed within 30 calendar days of the date of the email notice of the IOC report. Please follow the link provided in the email notice to submit either a Reconsideration or CAP for the inspection, all via AccessPoint.

The contractor (AFMC) will:

- (a) Review the Corrective Action Plan.
- (b) Determine whether the Corrective Action Plan is sufficient to credibly assure future compliance; and
- (c) Provide the Corrective Action Plan to the Division of Provider Services and Quality Assurance (DPSQA).

Please see § 160 of the Medicaid Manual for an explanation of your rights to administrative reconsideration and appeal. Additionally, the imposition of this Corrective Action Plan does not prevent the Department of Human Services from prescribing additional remedial actions as may be necessary.

Inspection of Care Summary

Facility Tour:

Upon arrival at the facility, AFMC staff were promptly greeted at the entrance by a Woodridge of the Ozarks receptionist in the main lobby. AFMC staff were not asked to sign in on the visitor log. AFMC was immediately taken to a conference room where they were met by the Chief Executive Officer and the Director of Risk Management. AFMC staff were given the completed and signed consent form listing approval for access to the AFMC portal. Facility staff were given the Document Request Form and AFMC staff discussed the requirements for the Inspection of Care.

A tour of the facility was completed with the Chief Nursing Officer. The areas that were toured included the administration office hallways, three client units, the seclusion room area, the school unit, outside grounds, cafeteria, and medication room. The following is a list of environmental observations noted during the facility tour.

- One of the two seclusion rooms has been converted into a sensory room and contains items to help clients calm. There has been foam puzzle floor tiles added to the room for comfort.
- The tour of the medication room was completed with the Director of Nursing since the nurse was unavailable. The facility has changed outside pharmacy companies to help with the medication delivery system to increase safety in medication administration to the clients. The facility has also purchased a brand-new medication cart. AFMC staff noted that the medication keys were hanging in the lock of the medication cart and were not being carried on the medication nurse which is per facility policy. The controlled substances are to remain double locked. The medication room door was locked, which is the first lock but the medication cart which houses the controlled substance was not secured as the second lock. The Director of Nursing took the keys to secure them until the keys could be given back to the medication nurse.
- The three units that house the female clients were all noted to have full size hygiene products in most of the client's bathrooms. During the tour the Director of Nursing asked several staff members to do a room sweep of all rooms to check for hygiene products and remove any items found.
- The bedrooms on the Green Unit which houses the older females were noted to have bed linens, paper, and clothes laying in the floor.
- Empty candy wrappers were observed in several rooms on all three units.
- Staff and clients were observed outside and in the cafeteria. AFMC staff noted that the milieu was much calmer than the previous Inspections of Care.
- Two educational classrooms were noted to have a lot of clutter on the floor and in the aisles between the desks. This is a safety hazard if an emergency evacuation is needed or if a client has a behavior outburst.

Facility Review – Policies and Procedures:

Upon review of the site's policies, procedures, and certification requirements, the following deficiencies were noted:

Regulation	Deficiency Statement	Reviewer Notes
Medicaid IP Sec. 2: 241.200	The facility did not provide one or more of the following: program descriptions, manuals, schedules, staffing plans and/or evaluation studies.	The provider lacked evidence of staffing schedules for the following dates and times: November 17, 2024, 7:00 pm to 11:59 pm November 18, 2024, 12:00 am to 7:00 am November 20, 2024, 7:00 pm to 11:59 pm November 21, 2024, 12:00 am to 7:00 am November 21, 2024, 7:00 pm to 11:59 pm November 22, 2024, 12:00 am to 7:00 am November 24, 2024, 7:00 am to 7:00 pm November 26, 2024, 7:00 pm to 11:59 pm

		November 27, 2024, 12:00 am to 7:00 am November 30, 2024, 7:00 pm to 11:59 pm December 01, 2024, 12:00 am to 7:00 am
--	--	--

Personnel Records – Licenses, Certifications, Training:

There was a total of fourteen personnel records reviewed, four (29%) professional and ten (26%) paraprofessionals. There were no deficiencies noted during the personnel record review.

Observations:

At the conclusion of the onsite inspection, AFMC staff reviewed the final document request form with the Chief Executive Officer and the Director of Risk Management at the completion of the on-site Inspection of Care and the provider signed the acknowledgement of manual requirements that were not made available in the provider's policy and procedures.

Clinical Summary

As a part of the Quality-of-Care survey of the IOC, an active Fee for Service (FFS) Medicaid client list was requested, client and/or guardian interviews were conducted, and a clinical record review was completed. The following is a summary of findings and noted deficiencies.

Client/Guardian Interviews:

There was no active FFS Medicaid clients currently admitted at the time of IOC. Therefore, no client interviews were conducted.

Program Activity/Service Milieu Observation:

Staff and clients were observed throughout the facility in a free time group activity in the outside courtyard, in the classroom setting on the school unit, and in the cafeteria eating lunch. Clients were engaged in schoolwork and activities. Staff were calmly interacting with clients and providing a therapeutic environment that was conducive for learning and treatment therapies. All areas with clients were noted to be staffed adequately and according to the facility's staffing ratio policy.

Medication Pass:

No active FFS Medicaid clients received medications during a medication pass while AFMC staff were onsite. Due to the observation of non-Medicaid clients not being compliant with the HIPAA minimal necessary rule, no medication pass was observed. The AFMC RN visited with the Director of Nursing who was able to show the AFMC RN the facility policies and procedures regarding medication administration, count/reconciliation/handling of controlled substances, and medication errors/discrepancies.

The Director of Nursing was able to verbalize the step-by-step process of medication delivery including the demonstration of the five rights of medication administration, documentation of medication delivery, verification of client taking medication including mouth/cheek checks, and how clients are educated about each medication. The facility nurse also verbalized the process utilized when a client refuses medication. A tour of the medication room was completed. The medication room was found to be extremely clean and well organized.

As previously stated in the above facility tour, the facility has changed outside pharmacy companies to help with the medication delivery system to increase safety in medication administration to the clients. The facility has also purchased a brand-new medication cart. AFMC staff noted that the medication keys were hanging in the lock of the medication cart and were not being carried on the medication nurse which is per facility policy. The controlled substances are to remain double locked. The medication room door was locked, which is the first lock but the medication cart which houses the controlled substance was not secured as the second lock. The Director of Nursing took the keys to secure them until the keys could be given back to the medication nurse.

Clinical Record Review Deficiencies:

There was no active FFS Medicaid clients currently admitted at the time of IOC. Therefore, no clinical records reviews were conducted.

Corrective Action Plan:

The CAP must be completed within 30 calendar days of the date of the email notice of the IOC reports. Additionally, any findings that were noted in any Health and Safety Inspection(s), which are governed by certification rules and requirements, are shared with DPSQA and may result in other remedial actions, by DPSQA, if warranted.

**For more details on the individual related deficiencies, please log into the portal.*

Woodridge of The Ozarks
2466 S 48th St, Ste B
Springdale, AR 72762-6683

The Division of Provider Services and Quality Assurance (DPSQA) of the Arkansas Department of Human Services has contracted with Arkansas Foundation for Medical Care (AFMC) to perform Inspections of Care (IOC) for Inpatient Psychiatric Services for Under 21. The Medicaid Manual for Inpatient Psychiatric Services for Under Age 21 was used in the completion of this report.

Observations and any deficiencies noted are listed below for the inspection conducted at the following service site on the following date:

Woodridge of The Ozarks
Provider Medicaid ID: [REDACTED]
Onsite Inspection Date: December 02, 2024
Onsite Inspection Time: 10:35 AM

A summary of the inspection and any deficiencies noted are outlined below.

The provider must submit a Corrective Action Plan (CAP) designed to correct any deficiency noted in the written report of the IOC. Accordingly, you must complete and submit to AFMC a Corrective Action Plan for each deficiency noted. The Corrective Action Plan must state with specificity the:

- (a) Corrective action to be taken.
- (b) Person(s) responsible for implementing and maintaining the corrective action; and
- (c) Completion date or anticipated completion date for each corrective action.

The CAP must be completed within 30 calendar days of the date of the email notice of the IOC report. Please follow the link provided in the email notice to submit either a Reconsideration or CAP for the inspection, all via AccessPoint.

The contractor (AFMC) will:

- (a) Review the Corrective Action Plan.
- (b) Determine whether the Corrective Action Plan is sufficient to credibly assure future compliance; and
- (c) Provide the Corrective Action Plan to the Division of Provider Services and Quality Assurance (DPSQA).

Please see § 160 of the Medicaid Manual for an explanation of your rights to administrative reconsideration and appeal. Additionally, the imposition of this Corrective Action Plan does not prevent the Department of Human Services from prescribing additional remedial actions as may be necessary.

Inspection of Care Summary

Facility Tour:

Upon arrival at the facility, AFMC staff were promptly greeted at the entrance by a Springwoods Behavioral Health receptionist in the main lobby. AFMC staff were not asked to sign in on the visitor log. AFMC was immediately taken to a conference room where they were met by the Chief Executive Officer and the Director of Risk Management. AFMC staff were given the completed and signed consent form listing approval for access to the AFMC portal. Facility staff were given the Document Request Form and AFMC staff discussed the requirements for the Inspection of Care.

A tour of the facility was completed with the Chief Nursing Officer. The areas that were toured included the administration office hallways, three client units, the seclusion room area, the school unit, outside grounds, cafeteria, and medication room. The following is a list of environmental observations noted during the facility tour.

- One of the two seclusion rooms has been converted into a sensory room and contains items to help clients calm. There has been foam puzzle floor tiles added to the room for comfort.
- The tour of the medication room was completed with the Director of Nursing since the nurse was unavailable. The facility has changed outside pharmacy companies to help with the medication delivery system to increase safety in medication administration to the clients. The facility has also purchased a brand-new medication cart. AFMC staff noted that the medication keys were hanging in the lock of the medication cart and were not being carried on the medication nurse which is per facility policy. The controlled substances are to remain double locked. The medication room door was locked, which is the first lock but the medication cart which houses the controlled substance was not secured as the second lock. The Director of Nursing took the keys to secure them until the keys could be given back to the medication nurse.
- The three units that house the female clients were all noted to have full size hygiene products in most of the client's bathrooms. During the tour the Director of Nursing asked several staff members to do a room sweep of all rooms to check for hygiene products and remove any items found.
- The bedrooms on the Green Unit which houses the older females were noted to have bed linens, paper, and clothes laying in the floor.
- Empty candy wrappers were observed in several rooms on all three units.
- Staff and clients were observed outside and in the cafeteria. AFMC staff noted that the milieu was much calmer than the previous Inspections of Care.
- Two educational classrooms were noted to have a lot of clutter on the floor and in the aisles between the desks. This is a safety hazard if an emergency evacuation is needed or if a client has a behavior outburst.

Facility Review – Policies and Procedures:

Upon review of the site's policies, procedures, and certification requirements, the following deficiencies were noted:

Regulation	Deficiency Statement	Reviewer Notes
Medicaid IP Sec. 2: 241.200	The facility did not provide one or more of the following: program descriptions, manuals, schedules, staffing plans and/or evaluation studies.	The provider lacked evidence of staffing schedules for the following dates and times: November 17, 2024, 7:00 pm to 11:59 pm November 18, 2024, 12:00 am to 7:00 am November 20, 2024, 7:00 pm to 11:59 pm November 21, 2024, 12:00 am to 7:00 am November 21, 2024, 7:00 pm to 11:59 pm November 22, 2024, 12:00 am to 7:00 am November 24, 2024, 7:00 am to 7:00 pm November 26, 2024, 7:00 pm to 11:59 pm November 27, 2024, 12:00 am to 7:00 am

		November 30, 2024, 7:00 pm to 11:59 pm December 01, 2024, 12:00 am to 7:00 am
--	--	--

Personnel Records – Licenses, Certifications, Training:

There was a total of fourteen personnel records reviewed, four (29%) professional and ten (26%) paraprofessionals. There were no deficiencies noted during the personnel record review.

Observations:

At the conclusion of the onsite inspection, AFMC staff reviewed the final document request form with the Chief Executive Officer and the Director of Risk Management at the completion of the on-site Inspection of Care and the provider signed the acknowledgement of manual requirements that were not made available in the provider's policy and procedures.

Clinical Summary

As a part of the Quality-of-Care survey of the IOC, an active Fee for Service (FFS) Medicaid client list was requested, client and/or guardian interviews were conducted, and a clinical record review was completed. The following is a summary of findings and noted deficiencies.

Client/Guardian Interviews:

There was no active FFS Medicaid clients currently admitted at the time of IOC. Therefore, no client interviews were conducted.

Program Activity/Service Milieu Observation:

Staff and clients were observed throughout the facility in a free time group activity in the outside courtyard, in the classroom setting on the school unit, and in the cafeteria eating lunch. Clients were engaged in schoolwork and activities. Staff were calmly interacting with clients and providing a therapeutic environment that was conducive for learning and treatment therapies. All areas with clients were noted to be staffed adequately and according to the facility's staffing ratio policy.

Medication Pass:

No active FFS Medicaid clients received medications during a medication pass while AFMC staff were onsite. Due to the observation of non-Medicaid clients not being compliant with the HIPAA minimal necessary rule, no medication pass was observed. The AFMC RN visited with the Director of Nursing who was able to show the AFMC RN the facility policies and procedures regarding medication administration, count/reconciliation/handling of controlled substances, and medication errors/discrepancies.

The Director of Nursing was able to verbalize the step-by-step process of medication delivery including the demonstration of the five rights of medication administration, documentation of medication delivery, verification of client taking medication including mouth/cheek checks, and how clients are educated about each medication. The facility nurse also verbalized the process utilized when a client refuses medication. A tour of the medication room was completed. The medication room was found to be extremely clean and well organized.

As previously stated in the above facility tour, the facility has changed outside pharmacy companies to help with the medication delivery system to increase safety in medication administration to the clients. The facility has also purchased a brand-new medication cart. AFMC staff noted that the medication keys were hanging in the lock of the medication cart and were not being carried on the medication nurse which is per facility policy. The controlled substances are to remain double locked. The medication room door was locked, which is the first lock but the medication cart which houses the controlled substance was not secured as the second lock. The Director of Nursing took the keys to secure them until the keys could be given back to the medication nurse.

Clinical Record Review Deficiencies:

There was no active FFS Medicaid clients currently admitted at the time of IOC. Therefore, no clinical records reviews were conducted.

Corrective Action Plan:

The CAP must be completed within 30 calendar days of the date of the email notice of the IOC reports. Additionally, any findings that were noted in any Health and Safety Inspection(s), which are governed by certification rules and requirements, are shared with DPSQA and may result in other remedial actions, by DPSQA, if warranted.
