Staff Inquiries

During the visit, licensing specialist inquired as to why resident 1 was not restrained in order to remove the objects from her hand. Staff 12 and facility risk manager stated the resident is violent and a restraint posed a higher risk to staff and resident 1 over allowing the resident to keep the board game pieces and put them in her mouth. Furthermore, support staff were required at multiple incidents taking place during this time. The extra support staff needed to safely restrain resident 1 was needed elsewhere.

After reviewing video footage for reports 028882, 028883, 028884 and speaking to risk management and nursing staff at the facility. Perimeter of the Ozark is found to be in compliance for the following standards:
