Purpose of Visit: Subsequent Building and Grounds

Regulations Out of Compliance:

Regulations Needing Technical Assistance:

Regulations Not Correctable:

Narrative:

Time of Visit: 1:15 pm to 2:00 pm

Census: 39

Licensing Specialist completed a walkthrough of EMCC of the following areas: new dorm, treatment hallway, a classroom, and the bathrooms. These are the areas that residents are housed until renovations have been

completed due to the damage that the facility sustained on 12/24/2022. Walking through the building, Licensing Specialist observed contractors removing the flooring and cleaning up the debris.

On the treatment hallway, Licensing Specialist observed the following: Conference Room had four (4) beds, one (1) toilet behind a door for privacy, and one (1) sink inside the room. Group Room had four (4) beds, one (1) toilet behind a door for privacy, and one (1) sink inside the room. There was a broken blind that maintenance replaced while Licensing Specialist was on site. VIP Room had four (4) beds, one (1) sink inside the room, and one (1) toilet behind a door. Belongings of the residents were near each bed in a white tall plastic basket. Boy residents are housed on the treatment hallway.

New Dorm consists of three (3) bedrooms, one full bathroom and one bathroom with a sink and shower. Both bathrooms were cleaned and functioning. The first bedroom had three (3) beds, second bedroom had three (3) bed, and the third bedroom had two (2) beds. All bedrooms were organized and clean, the bathrooms were clean, and the day area was clean and free of debris. New Dorm is where the girl residents are housed.

Licensing Specialist observed the classroom where boy residents are being housed, there was a total of five (5) beds. The bathrooms by the classroom are being used by the boy residents in the classroom and on the treatment hallway. Th residents on the treatment hallway use the bathrooms by the classroom to take showers. Facing the classroom door, the bathrooms to the right are full bathrooms. Licensing Specialist observed the light fixture above the showers were hanging down. The sinks operate by a sensor, a sensor was out on one of the sinks.

Maintenance was called and fixed the following concerns while Licensing Specialist was on site: the light fixtures, sink sensor, and replaced the blind in the group room. Licensing Specialist, Ms. Bennett, and Mr. Knowles discussed the how things were going with the accommodations for the residents. Licensing Specialist informed Ms. Bennett and Mr. Knowles of the upcoming board meeting.
