Street Suite B. Springdale, AR 72762? Please describe the incident: On 4/22/2025, at

approximately 21:00 a couple of residents passed around chipped tile pieces a resident broke

off in their bathroom shower. At approximately 21:15 resident [REDACTED] informed

nursing staff that she had swallowed a piece of tile. When questioned, [REDACTED] described the

tile fragment as "large and jagged." The attending medical provider was immediately

consulted. Following evaluation, a physician's order was issued to transport the resident to

the [REDACTED] for further assessment.

[REDACTED] was transported via facility vehicle, accompanied by two staff members. Upon arrival

at the [REDACTED], a CT scan was performed, which showed no signs of foreign objects or internal

injury. [REDACTED] was discharged from the [REDACTED] with instructions to monitor for any signs of complications, particularly bloody stool, and to seek medical attention if symptoms develop. Also, on 4/22/2025, resident [REDACTED] was observed swallowing a nickel-sized piece of tile. A medical provider was immediately consulted and based on the size of the ingested object, the provider assessed the risk as minimal and determined that acute care was not necessary at the time. On 4/23/2025, [REDACTED]'s mother was informed of the incident. Upon learning of the situation, she requested that [REDACTED] be taken to the [REDACTED] for further evaluation. [REDACTED] was subsequently escorted to [REDACTED] at approximately 09:30 AM. During her visit, an X-ray was performed, which confirmed the presence of a foreign object near the colon. [REDACTED] was discharged with instructions to monitor for any signs of complications and to seek immediate medical attention should symptoms develop. Actions Taken: Residents transported to the [REDACTED] [REDACTED] was placed on Suicide Ideation, Self-Harm, and Property Destruction precautions: Line of Sight Constant, Room Ban, Contraband Search, Paper Scrubs, and Restricted to Unit LD was on Suicide Ideation and Self-Harm precautions: Line of Sight Constant, Contraband Search, Paper Scrubs, and Restricted to Unit Room 304 bathroom is out of commission until fixed Examined all facility bathrooms for risk Received an on-site plumber inspection for replacing all tile surfaces with a single piece insert Room Sweeps Updated guardians as needed

Interim Action Narrative:

[REDACTED] Narrative:

Licensing Narrative: 4/25/2025 - Licensing specialist Jarred Parnell reviewed the report. Licensing specialist requested a photo of the damaged shower tile from facility risk manager and nursing notes for the report. A visit is scheduled for next 4/29/25 to do a buildings and grounds inspection of the facility. Licensing specialist Jarred Parnell received two photos of showers at the facility one is for room 304 and the other for room 305. Both photos have been reviewed and uploaded to ELS. Risk Manager at the facility states the tile was taken from 304, repairs have been made to the shower. Nursing notes and [REDACTED] discharge documentation received, reviewed and uploaded to ELS. 4/29/2025 - Licensing specialist Jarred Parnell conducted a buildings and grounds inspection for the report. The following was inspected during the walkthrough: All resident showers were inspected for safety on maintenance on the green unit, the orange unit, and the blue unit. The bathroom in room 305 which was mentioned in the report was inspected for repairs. Licensing specialist spoke with Buildings and Grounds staff on the damaged shower mentioned in the report and how

the resident was able to break a piece of the shower floor which had been epoxied. The jagged material obtained by the resident was a piece of the epoxy, not a shower tile. Licensing Specialist Jarred Parnell interviewed the buildings and grounds staff Ralph Pena on 4/29/2025 at: 11:23 AM. During the walkthrough I spoke with Ralph Pena. I asked Ralph to tell me about the shower in room 304 and explain what happened. Ralph stated the shower floor was redone in a previous remodel for the facility showers. Ralph stated the individual who put down epoxy put the layer too thick. The resident was able to pull a piece up. Ralph stated he fixed the drain utilizing the correct thickness of epoxy for the shower floor on top of a layer of leveling cement. This ensures the epoxy material will not be able to be removed by the residents in the future. Licensing specialist observed other shower drains in the facility which had been coated with epoxy at the correct depth and ensured they were unable to peel the epoxy away from the floor. 5/6/2025 - Licensing specialist followed up with the facility in regards to a plan of maintenance for showers and tiles to be checked on a routine basis. The maintenance plan was received, reviewed and uploaded to ELS.

Narrative:

Licensing Specialist Jarred Parnell conducted a visit to the facility on 4/29/2025 for a building and grounds inspection and to interview staff in relation to case #029231. The report was received by Licensing on

4/23/2025 for an incident in which a resident used a piece of jagged material removed from the shower to self-harm.

Census - 27

Minimum standards reviewed for the investigation:

911.6 - 6. All buildings and furnishings shall be safe, clean, and in good repair.

Observations made during the Buildings and Grounds Walkthrough:

The licensing specialist did a complete walkthrough of all bathrooms on the green unit, orange unit, and blue unit. A total of 15 bathrooms were observed. Bathrooms were inspected for safety, cleanliness, and good repair. All shower basins and tiles were observed during the inspection. Photos of all showers used by residents were taken during the walkthrough.

Staff Interviews:

Licensing Specialist Jarred Parnell interviewed the buildings and grounds staff on 4/29/2025 at: 11:23 AM.

During the walkthrough I spoke with Staff 1. I asked Staff 1 to tell me about the shower in room 304 and explain what happened. Staff 1 stated the shower floor was redone in a previous remodel for the facility showers. Staff 1 stated the individual who put down epoxy put the layer too thick. The resident was able to pull off a piece of the epoxy. Staff 1 stated he fixed the drain utilizing the correct thickness of epoxy for the shower floor on top of a layer of leveling cement. This ensures the epoxy material will not be able to be removed by the residents in the future.

Facility Implementation

The facility implemented a plan for regular daily maintenance checks specifically for bathroom showers to ensure tiles, and the epoxy in the shower basins are intact and in good repair. Housekeeping staff will inspect the showers in the morning while cleaning the resident's bathrooms. Direct care staff will inspect the showers during hygiene time before the resident enters the bathroom for use.

Based on information gathered during the investigation, the facility is found to be in compliance with standard 911.6 - 6. All buildings and furnishings shall be safe, clean, and in good repair.

******* Pursuant to A.C.A. § 9-24-406(c)(3-4): If you believe that the Department's notice of noncompliance is in error, you may ask for reconsideration. The request for reconsideration must be in writing and delivered to the Department by certified mail within twenty (20) business days of receipt of the notice of noncompliance. The request must specify the parts of the notice that are alleged to be in error, explain why you believe those parts are in error, and include documentation to support the allegation of error. Once received the Department shall issue a decision on your request within twenty (20) days after receipt of the request.**
